

Undergraduate Program

Our mission is to create an approach that blends research and teaching into a life-long process of advancement and learning for faculty, students, and community interests. This integration will foster the ongoing development of our course materials and teaching approaches thereby creating a generation of students not only prepared to be leaders, but also provided with challenging career paths and managerial opportunities. We will strive to maintain quality and flexibility in an evolving environment through a focus on leading change, globalization, managing technology, and entrepreneurship.
